

GDB Reference

run	Run Program
bt	Print program stack
continue	Run until next break
next	Execute next line, stepping <i>over</i> functions
step	Execute next line, stepping <i>into</i> functions

Breakpoints

break	Set Breakpoint
delete	
disable	
enable	

Display

print /f <expr>	Show value of expression according to format (f)
x /NUf <expr>	Examine N units (U) of memory at expression according to format (f)

Unit Size

b byte	w 4 bytes
h 2 bytes	g 8 bytes
